

Jhon Garcia Lecca

Full-Stack Software Engineer

New Jersey, USA

Mobile: (973) 389-3566 | Email: jhongxw@gmail.com

LinkedIn: <https://linkedin.com/in/jhonGarcia1> | GitHub: <https://github.com/jhongia>

Programming Skills

Programming Languages: C#, JavaScript, TypeScript, Python, SQL, C++

Frameworks & Libraries: .NET, Angular, AngularJS, Node.js

Databases: SQL Server, MySQL, MongoDB

DevOps & Tools: Git, GitHub Actions, Jenkins, Dynatrace, SonarQube, Jira, TFS, AWS S3, Google Analytics

AI Developer Tools: GitHub Copilot, Claude Code, Codex, Ollama, OpenClaw

Experience

ADP (Automatic Data Processing)

Roseland, NJ

Associate Application Developer | July 2022 – September 2024

- Developed and maintained large-scale enterprise Employee Self-Service web applications using Angular/AngularJS, JavaScript, C#, and SQL, supporting 100,000+ clients.
- Integrated a real-time customer support chatbot using AngularJS and C#, reducing assistance calls by over 40% and improving customer support efficiency.
- Implemented WCAG-compliant accessibility enhancements using Deque AxeDevTools, improving usability and ensuring regulatory compliance across enterprise applications.
- Designed and implemented dynamic, client-specific pages and menu configurations for 50,000+ users, consolidating multiple application portals into a single customizable platform.
- Designed and optimized secure C# microservices and REST APIs, enabling low-latency CRUD operations and reliable data access in SQL Server-backed systems.
- Optimized SQL Server queries and indexing strategies, reducing document retrieval latency and decreasing related production errors and support tickets.
- Strengthened application security by remediating XSS vulnerabilities and implementing secure token-based authentication and verification mechanisms.
- Collaborated in Agile/Scrum teams to deliver tested, production-ready APIs, participating in CI/CD workflows to ensure reliable deployment and system stability.

ADP (Automatic Data Processing)

Remote

Software Engineering Intern | June 2021 – August 2021

- Developed a full-stack document submission and processing web application using JavaScript, HTML, Bootstrap, and Python, enabling secure user uploads and automated workflows.
 - Implemented backend services using Node.js and Python to integrate with AWS S3, providing secure, scalable document storage and efficient retrieval.
 - Designed and optimized MongoDB data models to support high-volume document processing, improving application responsiveness and overall system reliability.
-

Education

Bachelor of Science in Computer Science — New Jersey Institute of Technology, May 2022

Associate Degree in Computer Science — Passaic County Community College, May 2019

Languages

Spanish (Native)
